HEALTH SAFETY ENVIROMENT POLICY

BOIS ET SCIERIE DU GABON.

Recently holder of a Forest Concession under Sustainable Management, its objective is certification, notably FSC COC.

One of its priorities for achieving this is to actively promote internal security, hygiene and health measures; as well as promote it among its subcontractors.

This process necessarily involves certain key points:

- The systematic identification and evaluation of accident risks linked to forestry activities, in order to prevent and keep them at a number close to 0.
- Ensure the quality of Personal Protection Equipment for workers, depending on each position in the operating and / or industrialization chain.
- Involve workers in work safety measures, as well as measures to preserve health in the workplace
- Promote the recruitment and training of employees in first aid.
- Enforce and respect the standards, national and international laws in force, in terms of health, safety and health.
- Make public the various safety and health processes adopted by the company.
- Follow the Gabon Requirement on the Environmental Protection.

These commitments can only be effective through the responsibility and discipline of everyone in the assigned tasks.
